45 Years: CEO (past or present) of a publishing company, a small university, several newspapers, two nonprofit organizations, a private police organization, and several technical building repair firms.

Objective:

As one of the first of the super-intelligent kids with Asperger's Syndrome, my life has been very interesting, and my employment has, too. Intelligence is actually a severe handicap in our society, unfortunately, but there are ways to handle it. A life-long Small Business CEO-COO, 45 years, multiple companies, I am used to 15-hour days, and currently stay busy by operating a Food Pantry, Soup Kitchen, Search Engine Website for finding resources, newspaper, and I provide free psychological counseling. My highest net worth was \$25-40 million (insurance estimate), highest income \$400 an hour, **currently zero and zero.** My strong suit is ideas, and my education as an Applied Psychologist (with all of the secret "alternative knowledge", too), gives me insights into behavior, beliefs, public relations marketing strategies, and even advertising. **I relish new product or service creation, innovative advertising and price structuring, new concepts, great customer service, and cost engineering.** I like publishing, writing editorials, writing tutorials, writing technical manuals, creation of college courses, teaching college, doing psychological counseling, and designing advertising, such as brochures, direct mail, print ads, graphics, television commercials, and radio spots. I would like to stay some sort of Shared Resource, helping many as opposed to only one company.

Accomplishments:

I suggested the development of Cellular Telephone Service and drew up a plan for Bell Systems Laboratories in 1970. I had the first (or among the first) cell phones. I advised Bud Selig how to end the Major League Baseball strike. I had a lot to do with getting Bill Clinton elected President, by influencing the Democratic National Committee. I pioneered and demanded the Housing-First concept of HUD. I coined the term "Yahoo" on worldwide amateur radio, to refer to my friends who were the technicians at the phone company trying to develop an internet. I routed the San Diego Green Line Trolley, and then suggested that the route would be even better if it served the San Diego Convention Center. After 30 years of no solutions to the problem of "City Hall Disease" in San Diego, I specified the cause (as an EPA Engineer) and found a \$10 solution. I did DNA Genetic Memory research regarding how talent is passed between generations. I did research into the electronic signature and brain effects of human love. I did research on electronic cures for cancer, pain, and mental illnesses. I established my A5A Services as a non-profit sole proprietorship. I invented the wireless bank holdup alarm. I also invented the lighted night Frisbee. I suggested Message Blocking for Microsoft Hotmail-Outlook e-mail. I did research in Psychology as an Undergraduate at the University of Wisconsin – Milwaukee. I taught College Sophomore clinical psychology

(intro) at UWM. I suggested to the Menominee Tribe, of Keshena, Wisconsin, that since their reservation is a Federal Territory, state laws against gambling do not apply, and they should start a casino, plus suggested a Downtown Milwaukee branch, too, by asking that some of that area become a part of their Reservation. I taught people how to brew their own beer, back when that was "Felony Bootlegging". I taught people how to install their own telephones, back when that was not permitted. I pioneered the Cost Engineering concept. I suggested a Net Worth Tax on the wealthy. I suggested to the Chicago Tribune that there needs to be some Democratic presence in the San Diego News Media, and suggested the possibility of an FCC complaint on that. I had a web page with internet solutions, i-page, on my website. I suggested humor to avoid suicides, and someday comedy in churches. I suggested to Phillip-Morris (Miller-Coors-Tecate) that Coors Light is the perfect hot weather beer for Mexico. I suggested via Mike Aguirre that there be a new building at the San Ysidro border crossing to accommodate the crunch of space there. I suggested that Keil's and Stater Bros. food stores should have facilities in East County and South Bay in San Diego. I suggested the cocaine patch to treat Asperger's Syndrome. Many food ideas for fusion foods that unite two different cultures, such as Italian-Chinese. Initial promoter of the acceptance of the theories of Abraham Maslow for use in military and poverty help.

I suggested that all Disability checks, such as SSI and SSDI be administered in two payments per month, one on the first, and the other on the sixteenth. The bank can keep a "funds hold" on some of the money. I invented "DollarMail". I suggested that God is an alien. I suggested that the Democrats and Republicans are not competitors, but actually the two parties of the Bar of London, USA division. I suggested that the drug cartel wars in Mexico are actually the US political parties duking it out. I suggested that JFK was killed by LBJ, with help from Nixon (LBJ admitted this on his deathbed).

I have had tens of thousands of other ideas, many that you would not believe, yet nowadays same can be proven via date-time stamps on

emails. If necessary, I can provide a lot more detail and examples, or I can come up with brand-new ideas for you right now. I am said to be cited 32 million times a year, which includes my humor, editorials, pen-names, nonprofits, books, tutorials, college courses, television clips and episodes, books, archives, companies, and web pages. I process 4 million e-mails a year. My strongest suit is fantastic ideas.

Employment:

Self-Employed since December, 1970, and always owning multiple businesses at the same time to take advantage of slow periods and varied successes, I started with Milwaukee Alarm Company in 1970, a silent, remote-monitored **burglar alarm, holdup alarm, bank vault alarm, and Private Police Organization** in Milwaukee, Wisconsin. I sold it in 1978, and it still operates today. At the same time, I owned A5A Services, a **heating and air conditioning firm** that was mostly nonprofit, teaching poor folks to sell, install, and repair heating and air conditioning equipment. In 1984, A5A Services added Alpine Air Conditioning and Heating, operating out of both Milwaukee, and also the San Diego suburb of Alpine, California. The Milwaukee Branch ceased operations in 1992, and the Alpine Branch went out of business in 2008 due to Economic Recession affecting Tiny Small Businesses. **Many other businesses, some dating back to 1969, continue to operate, including Milwaukee Free University and John Schlitz Publishing.** None are very profitable today, due to the current economic situation. See my website: www.NZ9F.com.

Duties:

Business Management, Administration, and Operations, from setting prices and policies to Legal, Secretarial, Engineering, Advertising (including television), Accounting, and Personnel (hiring, interviewing, screening). 26 employees in 1982. Small Business owners also must fill in for absent employees, doing everything from truck driving to janitorial work, as necessary. All that I did had never been done before in the same way.

Education:

Ph.D. in Applied Psychology, Milwaukee Free University - Milwaukee, WI, 1979.

Milwaukee Free University had 4 Colleges in the 1970's, starting with the College of Academics in 1969, formed as a protest by Professors at the University of Wisconsin – Milwaukee. It operated in complete secrecy until opening two other colleges a few years later, the College of Life Skills, and the College of Employment Skills, both funded by the US Dept. of Labor. The College of Academics remained secret 41 years, and some of what it did is still secret today. Milwaukee Free University is a Non-Standard, Alternate, Not-Accredited University that also taught subjects and perspectives which were **prohibited to be taught** at conventional universities. Other than learning secret information, all other aspects of the completion of a degree were the same as other universities. Milwaukee Free University became Insolvent in 1979, and I purchased it. I neither owned nor administered MFU while a student there, but did teach as a Grad Student, which is very common at any university. Just a note that Applied Psychology is neither Experimental nor Clinical, but rather the use of known principles to change thoughts, beliefs, and behaviors of normal people. Publishers, editors, ministers, coaches, politicians, community leaders, and spokespersons do this.

Bachelor of Arts in Psychology, University of Wisconsin – Milwaukee, 1978; Triple Major, with research done as an Undergraduate.

Self-taught, primarily, in Radio Engineering and the Engineering of Heating and Air Conditioning, with certifications passed. Certifications include Engineering Updates, such as Earthquakes, EPA Certification in Environmental Engineering (Heating and Air Conditioning); and, FCC Certification in Radio and Television Engineering, License NZ9F, 1978 (originally issued as N9ADQ).

Research in many fields, including Genetics, Charismatics, Genetic Memory, Societal Control, Electronic Pain Management,

Electronic Cures for Mental Illness, and Electronic Human Love.

References:

I work with many Community Leaders, and will not disturb them unnecessarily. If I am being offered a suitable position, I can supply this. Otherwise, you may get some wealthy and important people angry. When you demand several References, I use only those persons who are ordinary, the real list being secret.

What Now?

45 years of success in Small Business, followed by 7 years of making nearly no money begs a better income as an employee instead of an owner. I do have useful skills, and I would like the opportunity to profit from them by working for you.

JOB SEARCH CRITERIA – November, 2015

Dr. John Kitchin, Ph.D., NZ9F

PO Box 702, Alpine, CA 91903 •
nz9f@hotmail.com • (619) 390-5000

Colleges or Universities: Researcher, Adjunct Professor, Administrator, Dean, Assistant Chancellor, Vice President, Instructor.

Consultant: Publishing, Advertising, Broadcasting, Radio Communications, Psychology, University Course Creation, Building Automation, Public Relations, Operations Administration. Also: Camping, Hiking, Gourmet Cooking, Brewing Beer, and Poverty-Homelessness Issues.

CEO? Since Small Business uses IT and Finance differently than Big Business, I could function as the CEO of a major corporation, but **ONLY** with an excellent CIO and CFO. CEO of a Small Business? That fits perfectly.

NO: Insurance, Healthcare (except Research or Professor), Sales- Recruiting, Nonprofits, Franchises, nor Information Technology. Thanks for not asking.
